My portfolio: <http://portfolio.carolinagomezaniorte.com/>

Availability: Immediate

Residence: Valencia city, Spain (European union)

Nationality: Spanish

Age: 24 years

About me:

I am a future Fine Arts degree graduate from the UPV . To finish the degree I have to do 3 subjects (directly related to graphic design: typography, editorial layout with InDesign and Adobe Flash web design). I am specialized in graphic design and I have much experience using design software, especially Adobe software (InDesign, Photoshop, Illustrator, etc.), and the Internet.

Besides, I have driving license and own vehicle so I can move without problems. Also I can travel from time to time because the classes are flexible about attendance.

Ideal Job:

I like to do a job related to graphic design or internet. Besides, if it becomes interesting, it could reach an agreement on business practices with the university. Ultimately I am willing to learn and work.

Hours:

Currently, I'm looking for job, preferably in the evenings, including intensive afternoon session. I need combine it with my final year of studies because the classes are in the morning. Although in principle I have only the evenings I own full-time on Thursdays and non-teaching days at the university. As I said, this time only extend the nine months that lasts one academic year.

curriculum

Studies
